

9<sup>th</sup> October 2020

Dear Parents and Guardians,

### Design Technology iGCSE Virtual Exhibition 2020

The class of 2020 iGCSE in Design Technology had an exceptional year and worked hard throughout lockdown and a disrupted Easter term to produce their DT Major Projects and Portfolios.

They produced a wide range of creative solutions to a problem that they had each thoroughly researched. Development of their ideas through drawings and modelling, including CAD (Computer Aided Design), led to some excellent final prototypes. The products were taken home and during lockdown, the students finished their projects by testing and evaluating their outcomes and completing the online portfolios.

To showcase all of their hard work the Design Department have put together an online Virtual Exhibition. This will be available to view throughout October and can be accessed via the link below (full-page version) or from the QR code (single page version). From the exhibition catalogue, it is possible to link out to each individual portfolio to see how their design was developed and made.

Please browse through the pages and look at the wide range of topics that the students addressed in their designs. Click on the link below to view or scan the QR Code.
