

21<sup>st</sup> September 2023

Dear Parents/Guardians,

I am delighted to share with you the video that has been produced showing your daughter's experience and reflections from the Artificial Intelligence sessions that we were able to offer during Alternative Curriculum week. I hope you agree that it showcases their experiences, and you can see some of the skills and ideas generated – as well as the overall enjoyment! In addition to the skills and experience that we offer as The Ladies' College, we believe it is also an important positive message to encourage women, currently significantly underrepresented, into the digital technologies that are impacting all our lives. Please come along to our Key Stage three Curriculum event to hear more about how we are working to prepare your daughters for the future workplace.

The video does not and will not include the names of our students. We have reviewed and identified the students whose features are identifiable and checked to make sure we have consent for Intel to be able to use in their educational outreach programs. If we don't have consent currently, I will send home a consent form with your daughter; I hope you will be able to complete and return so we are able to continue to offer such experiences in the future and to promote The Ladies' College and women in technology in general.

Please use this link to access [intel ai for youth the ladies' college, guernsey \(1080p\).mp4](#)

Please do feel free to contact me if you have any queries or cannot access via the link above.

Kind regards,

Mr Howard Barnes  
**Director of Studies**
